CIRCLE SOLUTIONS

PRODUCT DEVELOPMENT

HERE'S A GLIMPSE OF WHAT WE ARE UP TO!

DIGITAL SIGN IN

FURTHER STREAMLINE YOUR ENTRY PROCESS

Visitors and Members will soon be able to sign in using mobile phone technology, via tap and go, allowing you to keep a single source of data.

We will integrate digital processes with your current hardware, and can also provide digital only kiosks for your venue.

## COVID SAFE MEASURES

ENSURE YOUR VENUE IS WELL PREPARED.

Capture visitor and member data including contact phone numbers (with confirmation prompts); facilitate sign in/sign out processes for capacity tracking, and ensure your venue is COVID safe.
Coming soon to Circle is hot spot entry restrictions (by postcode/suburb) and COVID person of interest capabilities.

GO CONTACTLESS

DIGITAL MEMBERSHIPS, BARCODES

Implement barcodes on all sign in slips to streamline sign out process and go contactless at your venue.

Members will be able to also receive physical sign in dockets when entering for proof of entry.

CENTRAL BANNING

BANNED FROM ONE, BANNED FROM ALL

Ban a patron or member from one venue and have it flow to others in your group via our ban central server capabilities.

We can also facilitate accord wide banning via Bar Boss integration to ensure your venue is in control and remove manual processes related to BFOBFA.

CIRCLE REPORTS

REAL TIME REPORTING DASHBOARD

We will be moving to a web based reporting dashboard, providing real time data, and improving our report delivery mechanisms.

Understand your data at a glimpse, drill down on patron information and extract business critical information quickly and easily.

CONTINUOUS IMPROVEMENT

Get in touch today. We are always keen to hear ideas and requests!
